THE ENSUITE ADVANTAGE

Every 2-bedroom, both bedrooms ensuite

[Insert: floor plan / layout diagram]

2-Bedroom layout — master and second bedroom each with a private bathroom

Out of Emaar's last 50 project launches, only three or four towers have offered fully ensuite 2-bedroom layouts. **Valia is one of them.**

Generously sized: at 1,255 sq ft average, Valia's 2-bedrooms sit well above the compact, single-ensuite layouts common across recent Dubai Creek Harbour launches.

A New Urban Node, Shifting Dubai's Gravity Back to the Creek

[Insert: masterplan / district map]

Ten Districts. One Address.

Each district carries its own identity, centre and open space — from G+2 community buildings to G+80 landmark towers around the central Icon.

Live today: Creek Island · Creek Beach · Greengate

70% of the masterplan is still to be built

THE CITY JEWELS

A 7km self-shaded Discovery Loop threads the masterplan together, linking nine lifestyle nodes — gardens, plazas and district centres designed as destinations in their own right.

- Green Gate
- Ravine Plaza
- Sanctuary Walk
- Palm Axis
- Estuary Plaza
- Cloud Gate
- The Lake
- The Pearl
- Icon Plaza

CREEK ISLAND

Valia's home district. The masterplan's central island, anchored by Icon Plaza and the incoming Dubai Square Mall.

CREEK BEACH

The southern waterfront district — 600m urban beach, marina promenade, and completed dining strip.

GREENGATE

The northern gateway district — direct link to Ras Al Khor and the wider Dubai road network.

GETTING AROUND THE CLUSTER

35km Dedicated cycling lanes

7km Self-shaded walking loop

15 Parks across the masterplan

7 Schools within the masterplan

Masterplan-wide infrastructure that directly serves Creek Island and the Ghaf District.

How Valia Prices Against the Market

Price per square foot — Valia vs Dubai Creek Harbour vs Downtown Dubai

Segment	AED / sq ft	vs Valia
Dubai Creek Harbour — masterplan average	2,400 – 2,500	Valia priced above
Creek Island / Island District (Valia's district)	2,400 – 3,200	Valia mid-range
Downtown Dubai — comparable Emaar product	2,800 – 3,200	Valia priced below
VALIA — blended launch pricing	**~2,585**	**Mid-district**

Based on aggregated public market data (2026); Valia figures computed from official launch pricing across all unit types.

VALIA — AED / SQ FT BY UNIT TYPE

THE OPPORTUNITY

25–35%

The discount Dubai Creek Harbour still trades at versus comparable Downtown Dubai product from the same developer, 3km away.

35–50%

Price-per-sq-ft growth across Dubai Creek Harbour since 2019–2020 launches (AED 1,400–1,600) to current releases (AED 1,900–2,400+).

The pattern: pricing discounts on emerging districts historically don't survive the arrival of infrastructure. The creek promenade, marina and central park are already open — Dubai Square and the Blue Line Metro are next.

Steps From Dubai Square — The Catalyst District

The world's first drive-through mall, and exactly where Valia sits within it

The Returns Case

Illustrative rental yield and capital appreciation modeling for Valia's 2-bedroom collection

Segment	Gross rental yield
Dubai Creek Harbour — area average	6.2% – 6.8%
Valia — estimated (2BR)	**6.5% – 7.1%**
Downtown Dubai — comparable product	4.8% – 5.5%

Gross yield estimates based on comparable Dubai Creek Harbour and Downtown rental listings, 2026. Actual yield depends on unit, furnishing, and tenancy terms.

5-YEAR VALUE SCENARIO — 2BR AVERAGE (AED 3.19M)

CONSERVATIVE
4%/yr
AED 3.88M
+AED 0.69M

BASE CASE
7%/yr
AED 4.47M
+AED 1.28M

OPTIMISTIC
10%/yr
AED 5.14M
+AED 1.95M

Scenarios modeled off Dubai Creek Harbour's 2020–2026 realized price/sq ft growth (35–50% cumulative, see page 4). Not a forecast or guarantee — Dubai off-plan markets are cyclical.

THE EXIT MATH

A base-case scenario, worked through

Entry price (2BR average)	**AED 3.19M**
Total paid by handover (8 instalments)	**AED 3.19M**
Projected value at handover (base case)	**AED 4.47M**
Estimated gross capital gain	AED 1.28M
Approx. gain on capital deployed	~40%

This is a modeled scenario, not a promise. It assumes the base-case appreciation rate holds, ignores transaction costs, service charges, and financing costs, and doesn't account for market downturns. Run your own numbers — and a client's — before using this in a pitch.
